- ✔ Customise alerts with your branding
- ✔ Include audible alerts
- ✔ Support for clickable URLs within alerts
- ✔ Schedule alerts in advance
- ✔ Central reporting and tracking
- ✔ Manage config via Active Directory
- ✔ Plus much more!

NetSupport Notify is a simple, low-cost, one-way alerting, and mass notification tool that enables an administrator to communicate instantly with desktop users or unattended public information displays across any size or type of school.

Key benefits

Save time

NetSupport Notify delivers messages (that can't be skipped or ignored) to selected/all staff and students in a single action (across multiple platforms) - saving precious time in the case of more urgent alerts. It also allows routine alerts (such as fire drills or routine IT system downtime) to be pre-scheduled for a fixed time and date. Plus, it does not require regular management of contacts, making it a quick and easy solution to use.

Emergency and lockdown communication

NetSupport Notify can be a vital communication tool during a school's emergency and lockdown procedures - and some integrate it as an official part of their emergency plans due to its ability to send a clear and concise message to all connected computers. Plus, administrators can create and use ready-made "emergency response" alerts, and send them from the office or on the move with our dedicated mobile apps.

Evidence of acknowledgment

Each message can carry a priority level from routine student/staff communication to technical alerts or even a critical emergency - and a request for acknowledgment. All delivered messages are recorded centrally with full delivery/ receipt logging and the ability to export a summary for future analysis.
