Key benefits

Incident Management

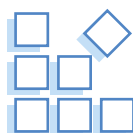

Incident Management aims to minimise disruption to the business by restoring services to the end user as quickly as possible and NetSupport ServiceDesk's automated workflow processes help you achieve this.

- ✓ Import user departments and companies from other systems into NetSupport ServiceDesk.
- ✓ Assign ServiceDesk operators to specific companies and departments in the user hierarchy.
- ✓ Pre-define the members of a Change Advisory Board (CAB) for each category of change request.

Problem Management

Effective Problem Management provides long-term value to the business by investigating the root cause of issues and deciding how to limit their impact. NetSupport ServiceDesk provides Problem Managers with a range of tools, including real-time report dashboards and advanced searching.

Reporting

NetSupport ServiceDesk offers a range of flexible reporting options, enabling you to capture comprehensive statistics in an intuitive and user-friendly format. This wealth of information ensures you are fully informed and can make effective decisions.

Service Level Management

Service Level Management is one of the core components of the ITIL Service Delivery framework. If a healthy relationship between the customer and IT team is to be maintained, it very much relies on the ability of the ServiceDesk to deliver efficient and cost-effective services within agreed timescales.

Integration

NetSupport ServiceDesk integrates seamlessly with other NetSupport and third-party network management solutions to provide you with the range of complementary tools you need.

Change Management

Organisations often have a disjointed or informal approach to Change Management but with NetSupport ServiceDesk's ability to gather and share information, you will quickly see the benefits of introducing a structured centralised system, with clearly defined reporting and approval lines established.

Customisation

- ✓ Custom Data Designer allowing for customised data fields.
- ✓ Profiled Operator access and customised functionality.
- ✓ Streamlined creation of a Solutions database to aid future help requests.
- ✓ Use the intuitive design tool available to administrators to add custom data items to records.
- ✓ Multi-lingual user interface.
- ✓ Custom report designer.
- ✓ Personalised "Home" page based on each operator's individual requirements.
- ✓ Personalised "Exit" pages.

User Management

- ✓ Active Directory synchronisation.
- ✓ Allow end users to generate ServiceDesk logon accounts or restrict generation of end user accounts to Administrators and ServiceDesk operators.
