

NetSupport School Tutor App – Windows 10

Provided as an addition to the traditional desktop Teacher app for Windows, the new native Teacher App is designed for installation on Windows tablets and touch-enabled desktops. In addition to all the expected core classroom features, the Teacher app also gives particular focus to the integration of key Windows 10 & Office 365 educational services:

Key features:

- 'Class Mode' connectivity option for direct integration with Microsoft School Data Sync.
- Transfer documents and resources, including directly from local or cloud-based OneDrive files, to all or selected students.
- Digital Student Journals - copy key lesson content into and work with OneNote Class Notebooks.
- Execute NetSupport School features using Cortana voice commands.
- Support for Microsoft Surface Dial - display a radial menu of NetSupport School features for quick execution of common tasks.
- Power on or off, log in/log out or reboot classroom computers.
- Present lesson objectives and expected outcomes.
- Gather a student attendance register.
- Monitor student screen thumbnails.
- View individual students.
- Monitor and restrict Internet use.
- Monitor and control application use (desktop and store).
- Launch applications and websites on student screens.
- Prevent data being copied to or from USB storage and CDR/DVD devices, plus Mute/Unmute Sound at student machines.
- Lock or blank students screens to gain attention.
- Chat and send messages to the class.
- Monitor student help requests.
- Conduct quick end of lesson surveys.
- Measure progress – including peer and individual assessment, scores and more.
- Virtual whiteboard supported by a wealth of drawing tools for improved collaboration within the classroom.

NetSupport School delivers dedicated versions for all leading platforms.
