

Participate in class surveys.

Monitor, control and block internet use.

Real time monitoring.

NetSupport School Student for Chrome

The #1 choice for IT educators worldwide, NetSupport School delivers the tools you need to help maximize the effectiveness of computer-led teaching and now you can utilize the power of NetSupport School in a Google Chromebook environment.

For use in your existing NetSupport-managed classroom, the NetSupport School Student app can be installed on each student machine running the Google Chrome OS. From the teacher's Windows desktop or Chrome OS device you can then connect to each system enabling you to monitor and interact with each student quickly and efficiently.

Key Features:

- **NEW** Optimised performance for Chromebooks running on battery mode
- **NEW** Monitor and control the websites and web activity on student Chromebooks
- **NEW** Extra security with password-protected 'Options' setting on student Chromebooks
- **NEW** Centrally manage NetSupport School settings from the Google Admin Console*
- View a crystal clear thumbnail of each student machine in a single view.
- Real time monitoring.
- Broadcast teacher's screen (Windows only) to student desktops.
- Send an instant survey or request for feedback to each student and display results in real-time.
- Send an attention-grabbing message or instruction to each student machine.
- The teacher can open a discussion session that all or selected students can join.
- Block unauthorized websites.
- Students can send a request for help to the teacher.
- Block unauthorized websites.
- Use approved websites only.
- Block all Internet access.
- Block FTP Access.
- Ask students to register at the start of each lesson.
