

IT Asset Management for your school or campus

Energy monitoring

creates reports on energy usage – showing schools where to save money!

Access a host of monitoring, communication and inventory tools from your tablet with the **iOS and Android Browser apps.**

Printer monitoring

reports on printer usage and costs across the school for more savings.

Use the **Power Management** feature to schedule devices to power on and off automatically.

Make further efficiency savings with the **Efficiency View dashboard.**

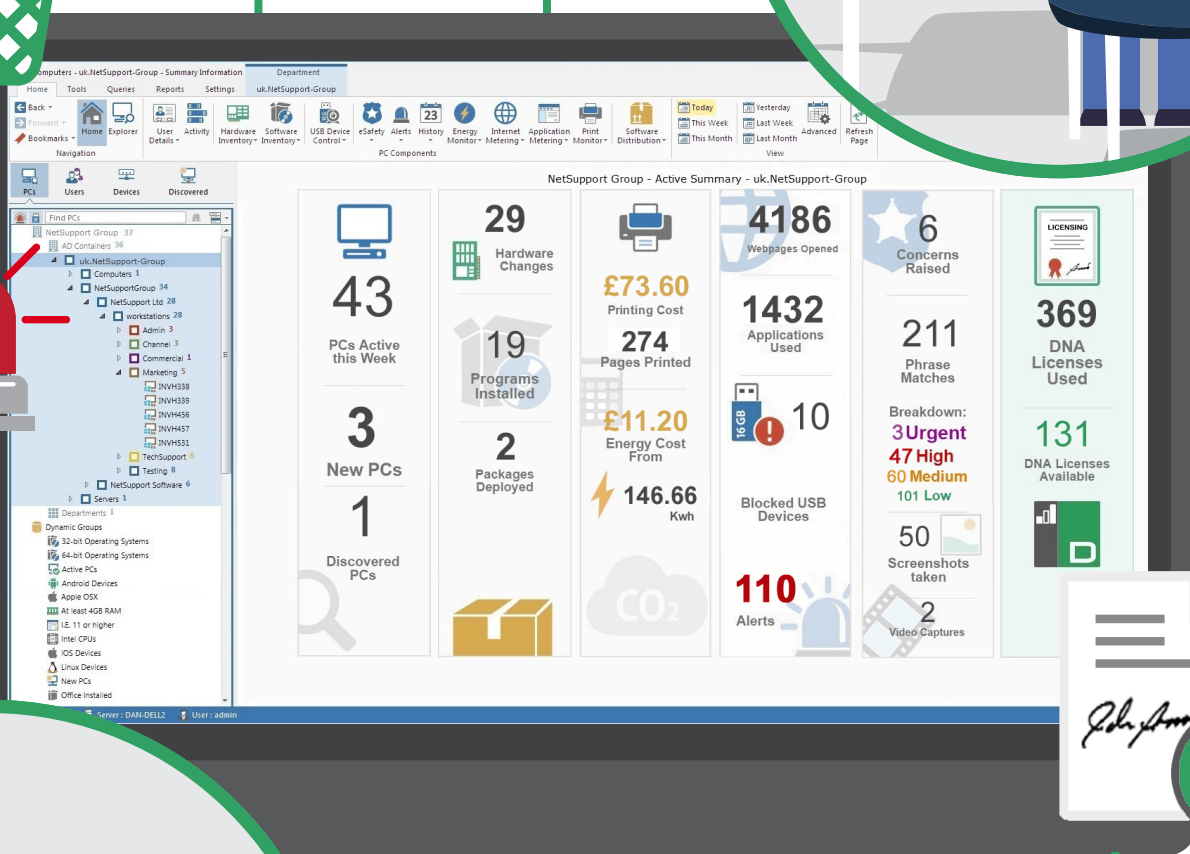

Reduce the amount of data stored with a **Data Retention Policy.**

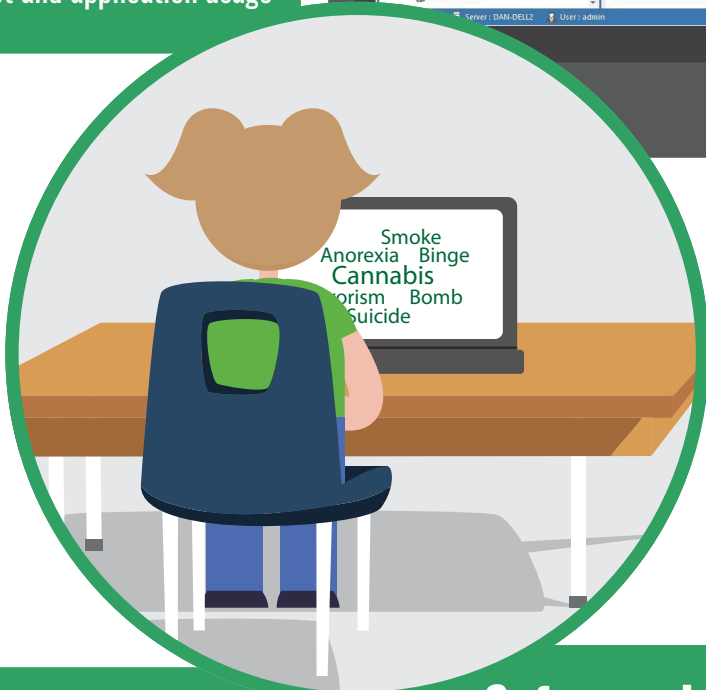

Be instantly alerted to changes to devices across the enterprise with **proactive alerts.**

Track and control internet and application usage

Perfect for use in **multi-academy trusts**, individual schools can create their own reports – and high level administrators can collate data from every school in the trust.

Flag "vulnerable" students on the system for extra support.

Safeguard students with keyword monitoring, age-appropriate internet control, Report a Concern for students – and much more.

Cloud-based safeguarding console

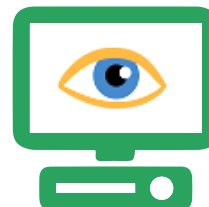

gives safeguarding leads access to alerts and reports on the go.

Manage USB stick use with endpoint security: register specific sticks or control access by teacher or department.

Off-site remote control.

Full **software and hardware inventory** summary.

Efficient software distribution: automatically push applications to target devices – or publish for departments to pull down on demand.

Contextual intelligence-based risk index automatically flags high-risk events and vulnerable students.
