

# IT Asset Management for your school or campus

**CPU**

Detailed **Hardware Inventories** of each supported device on the school network

✓

Full **Software Inventory** and licensing summary

!

**Alerting Module** - Instant alerts on any changes to devices across the enterprise

**Acceptable Use Policies** provides automated display, enforcement and tracking of Acceptable Use Policies for staff and students.

**Software Distribution** - application packages and curriculum content can either be "pushed" to target devices within classrooms automatically or published for a department to "pull" down on demand.

**School Reporting** allows IT staff to create bespoke reports and views using a simple drag-and-drop interface.

**Classroom Management** Monitor, Orchestrate and Assess student learning in the classroom

**ServiceDesk** module is also available to complete the full suite of Education friendly tools.

**Effective End Point Security** - allows specific USB memory sticks to be registered allowing a school to either restrict use to only those approved USB devices, or control access specifically by teacher or department.

**Energy Monitoring** - create reports on energy usage

**Power Management feature** - Schedule devices to be automatically powered on and off to save energy costs

**Printer monitoring** reports on printer usage and costs across the school.

**Internet and Application metering** - module not only tracks application usage per user, it also provides the tools to actually control application usage.
