

# Desktop alerting solution

**Low-cost** alerting and desktop notification solution for any size or type of organisation or school.

## Customise alerts

to match an organisation's colour scheme

Include an organisation's **logo**

Use NetSupport in hospitals, offices and schools...

Schools use NetSupport Notify as an essential communications tool for emergency situations.

Acknowledgements are recorded on your organisation's Notification Server.

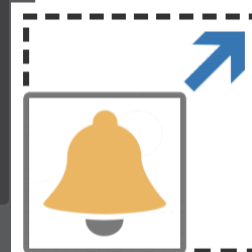

Play **custom sounds**

Choose whether to send the alert immediately, schedule it for later, or set it as a recurring alert.

Create new alerts in seconds with a caption and supporting text.

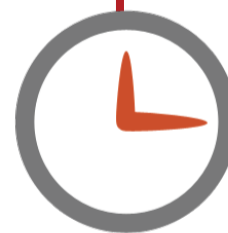

Display messages full screen on large information panels...

...and square and centred on desktops to ensure they can't be missed.

Set a severity level for the recipients to see.

Send alerts to the entire organisation, specific departments or classes – or even just to selected individuals or devices.

Choose whether the alert is to disappear after a set time or if you want recipients to acknowledge receipt.

View a full history of previous alerts if required.

Teachers can also use it to **request assistance with IT issues** or to **help with a challenging student.**
